

# Glencross & Hudson

Structural Engineers & Building Surveyors

## Practice Profile

### Introduction

The practice of Glencross and Hudson, consulting civil and structural engineers and surveyors, was established in 2008 in Hampton, Middlesex. The company has expanded to the West Midlands and has links in the South West area.

The practice has maintained a substantial and consistent work load, developing a sound reputation for its work in London and the south east of England. The geographical spread of offices enables the practice to service efficiently work throughout the south and extending to the Midlands, the West Country and London.

We are committed to providing a first class professional service regardless of size or complexity of the project. We strive to understand and fulfil your particular needs as effectively as possible, with the philosophy of a small company whilst offering the resource of a larger company.

We greatly value our professional reputation and most of our work is obtained from the personal recommendation of previous Clients.

Professional indemnity insurance is arranged through brokers administering a special scheme for Civil Engineers and Building Surveyors. This insurance is at a level of cover commensurate with the responsibilities arising from the overall conduct of the practice.

The practice serves a wide range of clients from companies, both large and small, to private individuals. It has long standing associations with structural repair and piling companies, architects and designers as well as building contractors and private clients throughout the UK. We aim to provide them with the best possible service at a reasonable cost.

### Directors

#### Richard Hudson, BEng MSc CEng MICE

Richard studied Civil Engineering at Sheffield University, graduating in 1987. He then worked for Balfour Beatty and Kier in site management roles before joining William Marshall & Partners where he worked as an assistant to expert witness consulting engineers. From 1996 Richard spent 3 years working as a loss adjuster for Ellis and Buckle and Courtney Smith before joining Helifix as a structural engineering manager. In 2005 Richard was promoted to technical director of Helifix and has consulted on structural repair projects world wide. In 2008 he left Helifix to establish his own practice.

BEng in Civil Engineering 1987 Sheffield University  
MSc in Geotechnical Engineering 1993, Surrey University  
Chartered engineer (MICE) Status gained in 1994.

#### Tracy Hudson

Tracy provides the financial and administration management, allowing staff to focus on operational issues and servicing our clients. She has a particular interest in project management and building renovation and is currently studying for a HNC in Building Studies .

Structural Engineers & Building Surveyors

## Resources

Our offices use the latest computer software and operating systems for civil and structural engineering analysis and design. CAD data can be exchanged between offices and with architects and clients direct by e-mail.

The practice maintains a comprehensive technical reference library and subscribes to the IHS web based services covering British Standards, Building Regulations, Building Research, Steel Construction Institute, Health and Safety legislation.

The practice also maintains access to the latest research and technical knowledge through membership of the principle advisory groups including Timber Research & Development Association (TRADA), Brick Development Association, Building Research Establishment and through individual membership of Engineering and Surveying Institutions.

**Many of our clients are home owners but the following is a sample of commercial clients demonstrating our ability to provide and projects**
